

USDA Farm to School Program

FY 2013 – FY 2017 Summary of Grant Awards

ABOUT THIS REPORT

This report summarizes findings from an analysis of select data from the 365 farm to school projects funded by USDA's Farm to School Grant Program during fiscal years (FY) 2013 - 2017. This analysis summarizes the ways in which the USDA Farm to School Grant Program helps diverse organizations around the country improve access to local foods through school meal programs.

This report is comprised of three sections: (1) executive summary, (2) overview of the USDA Farm to School Grant Program, and (3) appendices. The overview of the grant program includes a short introduction, information about grant project request and award amounts, information about grantee activities, and conclusions.

For more information about the data presented in this report, please contact the Office of Community Food Systems at farmtoschool@fns.usda.gov. This report was last updated on November 27, 2017.

EXECUTIVE SUMMARY

The term “farm to school” is generally understood to encompass efforts that bring local or regionally produced foods into school cafeterias; hands-on learning activities such as school gardening, farm visits, and culinary classes; and the integration of food-related education into the regular, standards-based classroom curriculum. The United States Department of Agriculture (USDA) supports such efforts through its Farm to School Program coordinated by USDA’s Food and Nutrition Service (FNS) [Office of Community Food Systems](#) (OCFS).

Section 243 of the Healthy Hunger-Free Kids Act (HHFKA) of 2010 tasked USDA with improving schools’ access to local foods through grants and technical assistance. Among other activities, USDA awards up to \$5 million on an annual basis in competitive farm to school grants for program planning, implementation, and support activities that may include training, partnership development, equipment purchases, and development and maintenance of school gardens.

In FY 2013 – FY 2017:

- 1,632 applicants requested a total of \$120.5 million.
- 365 projects were awarded a total of \$25.4 million.
- 50 states, the District of Columbia, Puerto Rico and the U.S. Virgin Islands received at least one award.
- 50 percent of awards were made to schools and school districts.
- 79 percent of all awards support schools or school districts with free or reduced price meal eligibility rates greater than 50 percent.

Funded projects are estimated to reach approximately 29,355 schools and involve an estimated 13 million students in farm to school activities.

Major grantee activities include:

- Procuring local foods for school meal programs.
- Training and networking for food service staff, teachers, and farmers on diverse topics including local procurement, food safety, culinary education, and integration of nutrition and agriculture-based curriculum.
- Purchasing equipment to support the additional food processing, preparation, and storage needed to handle local and regional foods.
- Delivering hands-on experiential education, in particular through school gardens, aimed at enhancing student knowledge, skills, and attitudes related to agriculture, food, and nutrition.
- Developing partnerships, communication networks, and outreach materials.
- Completing project evaluations to measure change and document outcomes and impacts.

THE USDA FARM TO SCHOOL GRANT PROGRAM

Introduction

The purpose of the USDA Farm to School Grant Program is to assist eligible entities in implementing farm to school programs that improve access to local foods in eligible schools. On an annual basis, USDA awards up to \$5 million in competitive grants for program planning, implementation, and support activities that may include training, partnership development, equipment purchases, and development and maintenance of school gardens. ¹

In FY 2013, planning and implementation grants were offered to eligible entities. In FY 2014, support service grants were introduced, and in FY 2015, training grants were made available using additional, discretionary program funds from the USDA Farm to School Program. In FY 2016 and FY 2017, training grants, which were very well received in FY 2015, continued with grant program funding. These four grant tracks are described below.

- (1) **Planning grants** are intended for schools or school districts just starting to incorporate farm to school program elements into their operations.
- (2) **Implementation grants** are intended for schools or school districts to help expand or further develop existing farm to school initiatives.
- (3) **Support Service grants** are intended for state and local agencies, Indian tribal organizations, agricultural producers or groups of agricultural producers, and non-profit entities working with schools or districts to further develop existing farm to school initiatives and to provide broad reaching support services to farm to school initiatives. ²
- (4) **Training grants** are open to the same entities as support service grants and are used to disseminate best practices and spread strategies known to succeed. ³

¹ In FY 2015, USDA awarded slightly more than \$5 million in grants using additional discretionary program funds.

² In FY 2016, USDA awarded \$495,211 in grant funds towards volunteer service awards. Additional details about these projects are provided in Appendix C.

³ Additional details about this grant track are provided in Appendix B.

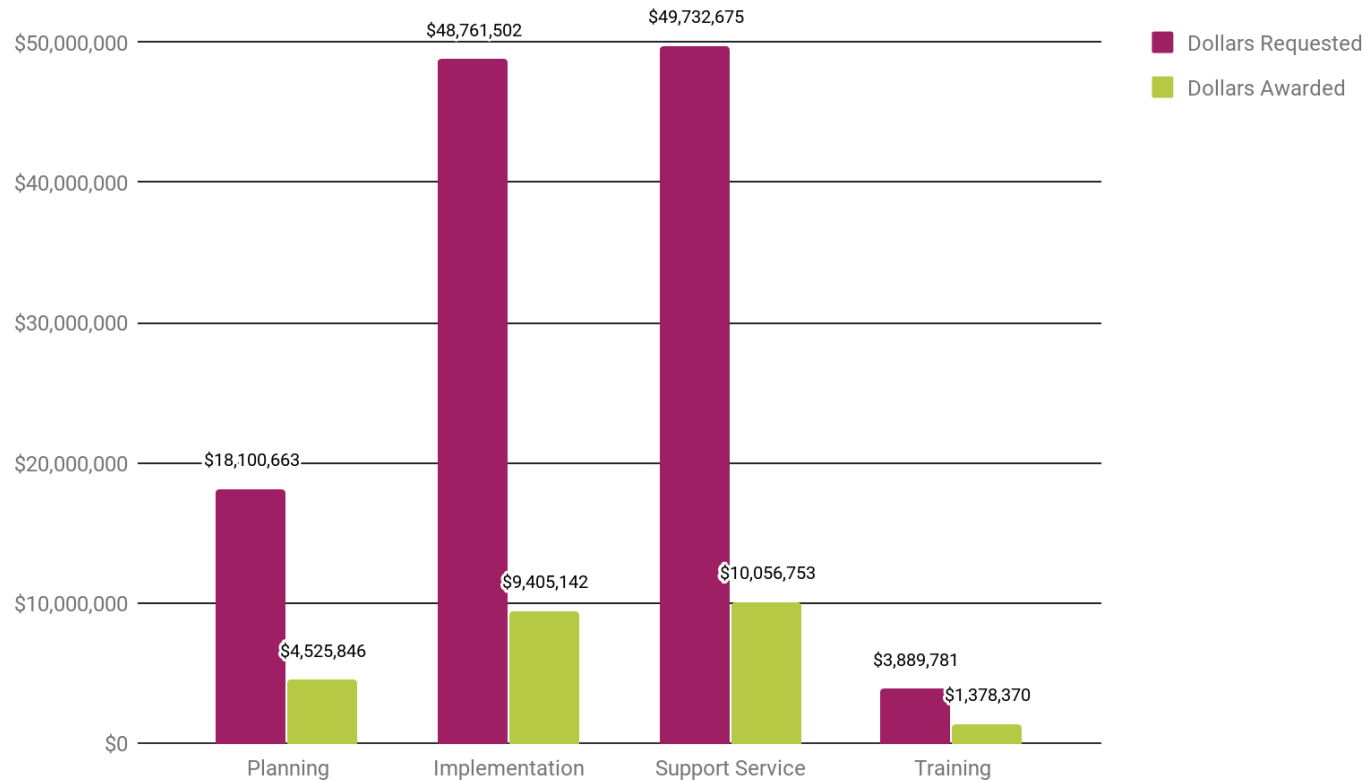

Grant Requests and Awards

Amounts and Types

From FY 2013 – FY 2017, grant program applicants requested approximately \$120.5 million in funding and were awarded \$25.4 million. Award amounts ranged from \$14,581 to \$100,000, with an average award amount of \$69,496. Grant awards supported no more than 75 percent of the total costs of each project. Figure 1 shows the total amount of requested and awarded funds by grant type. ⁴

Figure 1. Dollars requested and awarded by grant type in FY 2013 – FY 2017

⁴ Additional data about the number of grants and dollars requested and awarded by grant type is available in Table A1 and Table A2 of Appendix A.
USDA Farm to School Program FY 2013 – FY 2017 Summary of Grant Awards

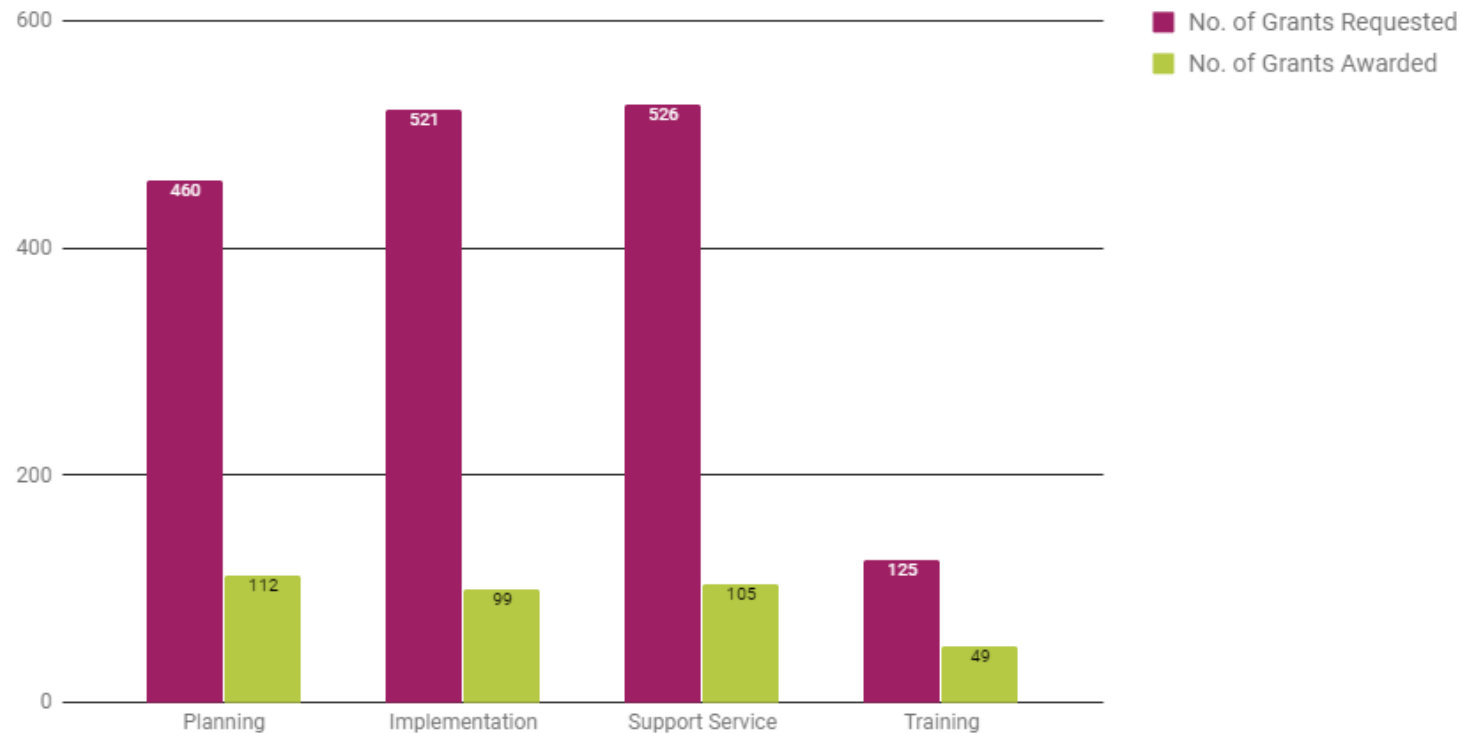

From FY 2013 – FY 2017, a total of 1,632 applications were received and 365 applications were funded for an overall award rate of 22 percent. As shown in Figure 2, 460 applications were received for planning grants and 112 were awarded funds. Additionally, 521 applications for implementation grants were received and 99 were awarded funds. Furthermore, 526 applications for support service grants and 125 applications for training grants were received and 105 and 49 applications were awarded funds, respectively.

Award rates by grant type vary. From FY 2013 – FY 2017, 24 percent of all planning applications have been awarded funds while 19 percent of all implementation applications have been awarded funds.⁵

⁵ Additional data about number of grants requested and awarded by grant type is available in Table A1 of Appendix A. *USDA Farm to School Program FY 2013 – FY 2017 Summary of Grant Awards*

Figure 2. Applications received and awarded by grant type in FY 2013 – FY 2017⁶

From FY 2013 – FY 2017, entities in 40 states and the District of Columbia have been awarded planning grants; entities in 36 states and the District of Columbia have been awarded implementation grants; and entities in 39 states, the District of Columbia, and Puerto Rico have been awarded support service grants.⁷ In addition, entities in 36 states and the U.S. Virgin Islands have received training grant awards and there have been 40 repeat grantees, including 19 grantees that have been awarded both planning and implementation grants.⁸

⁶ In FY 2013, support service grants were classified as “implementation other” and are included as implementation grants in this figure.

⁷ Additional data including a state by state breakdown of awards by type is in Tables A11 and A12 of Appendix A.

⁸ Additional data on repeat grantees may be seen Table A17 of Appendix A.

Organizations Applying for Grants

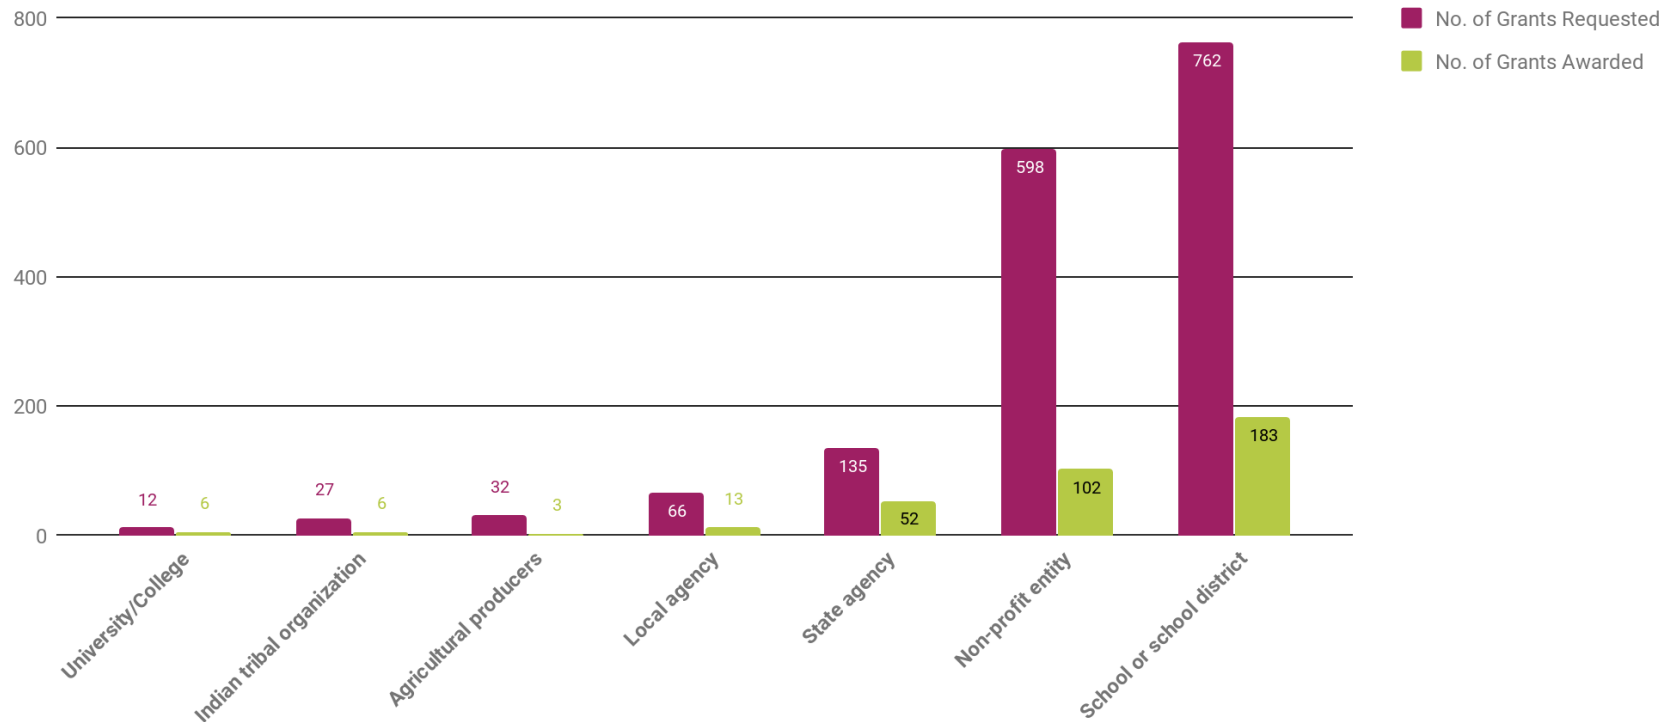

USDA Farm to School Grant Program funds are available to eligible schools, state and local agencies, Indian tribal organizations, agricultural producers, non-profit entities and higher education organizations.⁹ The numbers of these groups requesting and receiving awards are shown below in Figure 3. Schools applied for and received the highest number of awards (183 grants), followed by non-profit entities (102 grants).

Award rates by applicant type vary. From FY 2013 – FY 2017, universities, colleges, and cooperative extensions have had the highest award rate at 50 percent, followed by state agencies with an award rate of 39 percent, while schools or school districts have an award rate of 24 percent.¹⁰

⁹ Higher education organizations were only eligible for training awards offered in FY 2015.

¹⁰ Additional data about numbers of grant requests and awards by entity type are available in Table A3 of Appendix A.

Figure 3. Grant requests and awards by applicant type in FY 2013 – FY 2017⁹

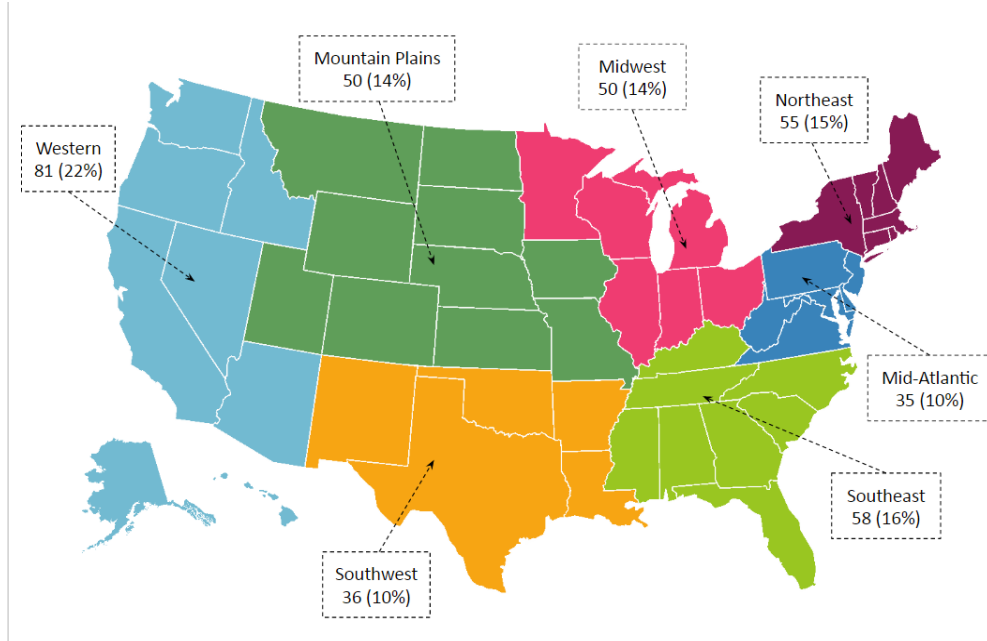

From FY 2013 – FY 2017, 46 states and the District of Columbia have had schools or school districts receive a grant award; 37 states and the District of Columbia have had non-profit organizations awarded a grant; and 35 states, the District of Columbia, and the U.S. Virgin Islands have had state agencies awarded grants.¹¹

¹¹ Additional data including a state by state breakdown of awards by entity type are available in Tables A14 and A15 of Appendix A.
 USDA Farm to School Program FY 2013 – FY 2017 Summary of Grant Awards

Geographic Distribution

Figure 4 shows the distribution of grant awards by FNS region.¹² Organizations in the Western region applied for and received the highest number of grants (81 grants or 22 percent of the total number of awards). Organizations in the Southeast region received the second highest number of grants (58 grants or 16 percent of total awards) followed by the Northeast region (55 grants or 15 percent of total awards).

Figure 4. Distribution of grant awards (N = 365) by FNS region in FY 2013 – FY 2017

From FY 2013 - FY 2017, 37 percent of the schools or districts impacted by a USDA Farm to School grant were considered rural and 63 percent were considered urban at the time of the application.¹³

¹² A state-by-state breakdown and additional details of regional distribution of awards are available in Appendix A.

¹³ Thirteen percent of the schools or districts impacted by a FY 2013 – FY 2017 grant project did not provide this data to USDA. A year by year summary is available in Table A4 of the Appendix.

Students Served

Funded projects are estimated to have reach approximately 29,300 schools and involve an estimated 13 million students in farm to school activities.

The grant program prioritizes applicants that serve a high percentage of students eligible for free or reduced-price meals. Figure 5 compares the distribution of U.S. students at schools of different free and reduced-price meal eligibility rates to the corresponding percentage of USDA Farm to School grants serving schools at those eligibility levels.¹⁴

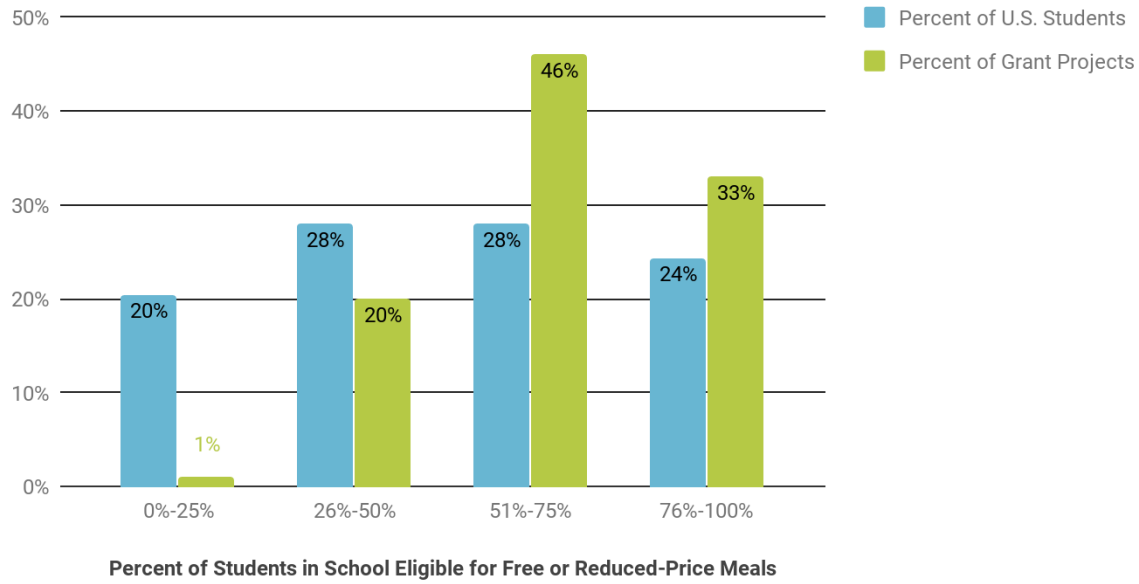

Based on available data from grantees (287 of 309 grant projects), the majority of grant awards (227 or 79 percent) went to support schools or school districts with free or reduced-price meal eligibility rates greater than 50 percent. As shown in Figure 5, by comparison 52 percent of U.S. public school students attend schools with eligibility rates greater than 50 percent. Approximately 7.5 million (59 percent) of the 13 million students impacted by these grant awards are eligible for free or reduced-price meals.^{15, 16}

¹⁴ U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), “Public Elementary/Secondary School Universe Survey.” See *Digest of Education Statistics*, table 216.60. Fall 2014.

¹⁵ A summary detailing the number and percent of grant projects by free or reduced price meal eligibility rates can be found in Table A6 of Appendix A.

¹⁶ Data about students eligible for free or reduced price meals is not available from all 309 school based projects because 22 grantees were unable to provide this type of information.

Figure 5. Distribution of U.S. public school students at schools of different free or reduced-price meal eligibility rates and corresponding distribution of grant awards

Grantee Activities

Farm to school programs can include many different types of activities. As noted previously, USDA Farm to School Grant Program funds support both the planning and implementation of farm to school programs by schools and districts, and also provide support for these activities from external organizations.

Planning often includes convening a farm to school team; creating a program vision and goals; establishing procurement plans; developing new menu options; training staff; preparing kitchens; and building community awareness. Many planning grantees will both plan and begin to implement their programs during the course of their funded project.

The implementation of farm to school programs often includes food procurement, processing, and preparation; developing supply chain solutions; communication and outreach efforts; program administration; delivery of curriculum activities; building and maintaining gardens; providing training; purchasing equipment; and many other activities.

Local Food Procurement

Finding, buying, and serving local foods is a central activity of farm to school programming. Table 1 lists proposed local procurement activities.

Table 1. Planned local food procurement activities FY 2013 – FY 2017

	Percent of Grantees Planning This Activity
Training specific to the procurement of local and regional foods	47%
Work on distribution solutions (e.g., food hubs, partnerships with distributors)	33%
Training for farmers, food service personnel, and garden coordinators about food safety, food handling, and good agricultural practices (GAP)	32%
Develop aggregated supply approaches (e.g., farmer cooperatives, product aggregation solutions)	20%
Develop aggregated buying approaches (e.g., school based cooperatives)	19%
Purchasing agriculture production supplies (<\$5,000 a unit)	13%
Purchasing food processing, manufacturing, or distributing equipment (>\$5,000 a unit)	9%

Local Food Processing and Preparation

Processing, storing, preparing and serving fresh, local foods often requires new cafeteria infrastructure, new menu items, and staff training. Proposed processing and preparation activities are shown in Table 2.

Table 2. Planned local food processing and preparation activities FY 2013 – 2017

	Percent of Grantees Planning This Activity
Develop new products for menus	51%
Training for food service staff such as menu planning, and culinary skills	45%
Purchasing school kitchen supplies (<\$5,000 a unit)	36%
Value-added approaches (e.g., canning, storing, freezing)	25%
Purchasing school kitchen equipment (>\$5,000 a unit)	18%
Acquire salad bars	9%

Agriculture, Food, and Nutrition-based Education

A large percentage of grantees included activities related to the educational aspect of farm to school programming. Proposed agriculture, food, and nutrition-based education activities are shown in Table 3.

Table 3. Planned agriculture, food, and nutrition-based education activities FY 2013 – FY 2017

	Percent of Grantees Planning This Activity
Experiential learning activities (e.g., field trips, cooking, taste tests)	67%
Curriculum development	54%
Purchase classroom materials to support instruction	43%
Teacher training	33%

	Percent of Grantees Planning This Activity
Parental involvement activities	11%

School Gardens

School gardens are a natural fit for farm to school programs as they provide a nearby, hands-on learning laboratory. Proposed school garden activities are shown in Table 4.

Table 4. Planned school gardens activities FY 2013 – FY 2017

	Percent of Grantees Planning This Activity
Enhancements to existing garden programs	52%
Purchase garden supplies and/or equipment	35%
Start new garden programs	31%
Install hoop houses or greenhouses	13%

Partnerships and Outreach Activities

Diverse partnerships between the many school and community-based stakeholders (i.e. school faculty and staff, parents, farmers, distributors, food service companies, and policy makers) are a key component of program success and sustainability. Recognizing this, USDA requires that applicants for implementation and support service grants demonstrate proof of existing partnerships. For planning grants, identifying partners and solidifying partnerships during the funding cycle is a required key component.

Communication and outreach are also critical program elements needed to build the less formal partnerships with the larger community including parents, local businesses, community members, and other important stakeholders. Proposed partnership and outreach activities are shown in Table 5.

Table 5. Planned partnerships and outreach activities FY 2013 – FY 2017

	Percent of Grantees Planning This Activity
--	--

	Percent of Grantees Planning This Activity
Strengthen existing partnerships	86%
Other types of outreach and communication (e.g., events, media)	69%
Develop new partnerships	67%

Program Evaluation

All grantees are required to conduct evaluations and report data about the processes, outputs, and outcomes of their work. Some conduct their own evaluation and others hire external evaluators. Grantees proposed to measure a variety of outcomes including changes in children’s attitudes, knowledge or behavior related to food; levels of community engagement; economic effects on producers; changes in children’s health; and policy changes. Proposed program evaluation activities are shown in Table 6.

Table 6. Planned program evaluation activities FY 2013 – FY 2017

	Percent of Grantees Planning This Activity
Use quantitative methods such as student surveys, waste audits, and procurement data analysis	88%
Use qualitative methods such as interviews and/or focus groups	72%

Conclusions

Analysis of the 365 funded proposals from the first five years of grant making suggests all farm to school activities described in HHFKA are being implemented through a wide variety of approaches by diverse grantee organizations. Schools and school districts have received the most grant awards followed by non-profits and state agencies. USDA has awarded the most number of planning grants (n=112) followed by roughly the same number of support service grants (n=105) and implementation grants (n=99). In pursuit of regional balance, grant awards have been made in all 50 states, the District of Columbia, Puerto Rico and the U.S. Virgin Islands. Award rates (ratio of grant requests to awards) by FNS region vary from 19 to 31 percent.

Grantees planned many strategies for achieving the goal of increasing access to local foods in schools. For example, 51 percent of projects included expansion of menu options; 47 percent included training to help schools and districts procure local and regional foods; and 45 percent included training for food service staff about menu planning, meal preparation, and cooking with local and regional foods.

Grant projects also served a high proportion of children who are eligible for free or reduced-price lunch. The overwhelming majority of grant awards (79 percent) went to schools or school districts with free or reduced-price meal eligibility rates greater than 50 percent. Sixty-seven percent of grantees planned to incorporate experiential nutrition education activities that encourage children's participation in farm and garden-based agricultural education activities.

Strong partnership data (86 percent planned to strengthen existing partnerships and 67 percent planned to develop new partnerships) suggest the potential for widespread collaboration between eligible schools, non-governmental and community-based organizations, agricultural producer groups, and other community partners.

Lastly, the ability to demonstrate the outcomes of these efforts is enhanced through grantee evaluation activities with 88 percent using quantitative methods and 72 percent using qualitative methods to assess their programs.

APPENDIX A. ADDITIONAL DATA TABLES

Table A1. Number of grant requests and awards by grant type for FY 2013 – FY 2017

	Number of Requests	Number Awarded	Percent Awarded by Type	Percent of Total Grants Awarded

APPENDIX B. TRAINING GRANTS

Training grants are intended to support state, regional, and national trainings that strengthen farm to school supply chains, or trainings that provide technical assistance in the area of local procurement, food safety, culinary education, and/or integration of agriculture-based curriculum. Training grants were supported in FY 2015 using discretionary program funds and were open to all interested parties, including colleges and universities. The training grants continued with grant funds in FY 2016 and FY 2017 and thus ineligible entities (e.g. colleges and universities) were excluded. Table B1 summarizes training grant requests and awards from FY 2015 to FY 2017.

Table B1. Training grant requests and awards FY 2015 – FY 2017

	Total Applications	Total Awards	Total Amount Requested	Total Amount Awarded	Percent Awarded	Percent of Dollars Awarded	Percent of Total Training Grants Awarded	Percent of Total Training Dollars Awarded
National	14	4	\$667,702	\$191,666	29%	29%	8%	14%
Region	33	9	\$1,405,283	\$375,764	27%	27%	18%	27%
State	78	36	\$1,816,796	\$810,9409	46%	45%	74%	59%
Total	125	49	\$3,889,781	\$1,378,370	39%	35%	100%	100%

APPENDIX C. VOLUNTEER SERVICE GRANTS

Beyond the \$5 million in funding provided in the HHFKA, in FY 2016, USDA awarded an additional \$495,211 in grant funding to support placement of volunteer service members (e.g. AmeriCorps, VISTA, local service corps programs, etc.) in schools throughout the country to build or maintain school gardens, incorporate nutrition education into the schools’ culture, and support school food service personnel in procuring or promoting local and regional products for the school meal program. The President’s FY 2016 initial budget request originally allocated \$1 million for this grant making priority. Congress approved a budget request of approximately \$871,000 and USDA subsequently sequestered an additional \$224,000 leaving \$647,000 for grant making. Table C1 summarizes the grants made with these funds.

Table C1. Volunteer service grant requests and awards FY 2016

Total Project Applications	Total Project Awards	Percent of Projects Awarded	Total Dollars Requested	Total Dollars Awarded	Percent of Dollars Awarded
20	5	25%	\$1,438,229	\$495,211	34%
