

TAKE THE
PLEDGE!

Support a just, healthy & resilient food system for all.

The Food Solutions New England Pledge

I/We envision a regional New England food system that is sustainable, just, and resilient. I/we agree that:

- A just food system requires the active participation of as many people as possible across New England.
- We celebrate and value the political power of the people and strive to advance a food system that supports democratic empowerment in all its forms. Fairness, inclusiveness, and solidarity must guide our food future.
- We believe that racism must be undone in order to achieve an equitable food system. We commit to using our power and privilege to support racial equity and dignity for all.
- Sustainability commits us to ensure well-being for people, animals and the lands and waters within which we are all located, now and in the future. We know that our food system is interconnected with the health of these lands and waters, our democracy, our culture and our economy. We seek to lift up and support the principles and practices of sustainability, in its many forms.
- Trust is the lifeblood of collaboration and collaboration is key to our long-term success. We are committed to building trust among diverse people, organizations, businesses, networks, and communities to support a thriving food system that works for everyone.
- Together, we can make meaningful progress across our six-state region toward the shared goals in the New England Food Vision, building a stronger and more resilient regional food system.
